

Creator

3.2 Starting a Work

The screenshot shows the Scholar Creator interface. At the top, there is a navigation bar with 'Scholar' logo, 'Community', 'Creator', 'Publisher', 'Analytics', and 'Bookstore' buttons. A search bar is on the right. The main content area is titled 'Climate Change > Introduction: The Great Climate Change ...'. It contains a rich text editor with the following text: 'By studying the history of the earth, the scientific community has discovered the dynamic nature of climate and weather. *Global weather* patterns are in a constant state of change as evidenced by alternating ice ages and warmer periods. Temperature fluctuations are a natural part of the earth's climate. However, recent changes have become a major concern of scientists. As Professor Maria Cervantes from the Colorado Weather Research Center says:'. Below this is a math equation:
$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$
. A quote follows: 'Climate Change has generated a great deal of public and scientific attention. Ground-based monitoring indicates that worldwide temperatures have increased by 0.6°C over the last decade.'^[1]'. Below the quote is a photo of a vast, flat landscape covered in ice under a cloudy sky. At the bottom left of the editor is a 'Save' button, and at the bottom right is a 'Saved at 10:23am' status indicator. On the right side, there is a 'Works' sidebar with a 'New' button. Below it is an 'About This Work' section with tabs for 'Project', 'Info', 'Structure', 'Versions', 'Creators', and 'Publish'. The 'Publish' tab is active, showing a 'FIND A PUBLISHER' section with a 'Type' input field, a 'Add a message...' text area, and a 'Connect with Publisher' button. Below that is a 'Feedback' section.

3.2.1: Creator is a space where you can create and store works. You can also have a work reviewed by peers and published. There are two ways for a work to be connected to a publisher and a publishing project:

- You may receive a work request in your notifications area. Take the link in this work request to a new, blank work called “Untitled.” Go to About This Work => Info to give the work a title. Do not start a new work if an admin is going to set up a project for you.
- You may start your work then find a Publisher, as illustrated in the screenshot above. Go to About This Work => Publish, search for a publisher and write them a message, then select [Connect with Publisher]. If the publishing admin agrees to review your work, you will receive a notification. When you receive this notification, click the option “Use a Work You Have Already Started.”

The screenshot shows the Scholar interface. At the top, there is a navigation bar with 'Scholar' logo, 'Community', 'Creator', 'Publisher', 'Analytics', and 'Bookstore' buttons. A search bar is on the right. Below this is a breadcrumb trail: 'Climate Change > Introduction: The Great Climate Change ...'. The main content area has a rich text editor toolbar and contains the following text:

By studying the history of the earth, the scientific community has discovered the dynamic nature of climate and weather. *Global weather* patterns are in a constant state of change as evidenced by alternating ice ages and warmer periods. Temperature fluctuations are a natural part of the earth's climate. However, recent changes have become a major concern of scientists.

As Professor Maria Cervantes from the Colorado Weather Research Center says:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Climate Change has generated a great deal of public and scientific attention. Ground-based monitoring indicates that worldwide temperatures have increased by 0.6°C over the last decade.^[1]

The sidebar on the right is titled 'Works' and contains a section 'About This Work' with sub-sections: 'Project', 'Info', 'Structure', 'Versions', 'Creators', and 'Publish'. The 'CREATORS' section lists 'William Cope' and 'Rita van Haren' with icons for adding, reordering, and deleting creators. There is also an 'Add a Creator' button and a 'Feedback' section below.

3.2.2: If a work is to have multiple creators, go to Creator => About This Work => Creators and invite additional creators. You can arrange the order in which the creators need to be credited by hovering over the name of a creator and selecting the Reorder icon. Some admin-initiated publishing projects may not allow coauthors.
