3.8: Reviewing a Work

3.8.1: When you have been assigned as a reviewer to give feedback to one of your peers, you will receive a “Review Request” in your notifications. Click [Review Request]. This will take you to the work you have been assigned to review.

3.8.2: To start, make sure you are familiar with the rubric in Feedback => Reviews => Rubric.

3.8.3: Next thoroughly read the work, keeping the rubric in mind. To view the rating scale details, click the orange arrow for each criterion.

3.8.4: Once you are ready to review, go to Feedback => Reviews => Review Work. Use the review tool to rate the work on each criterion and explain why you gave the work that rating. Please note that you must write something in the box for each criterion. Scholar will automatically save your review, so you can come back and finish it later. Tutorial 3.9 will explain how to submit your review.
