

# Tutorial A4.3: Focus Settings

The screenshot shows the Scholar Publisher Admin interface. At the top, there's a navigation bar with the Scholar logo and various menu items like Community, Creator, Publisher, Analytics, Event, and Bookstore. Below this, the main content area is titled "Publisher Admin" and displays information for "Publisher: EPSY 408 SP19" and "Is Active: true". The date is "Sunday, December 23, 2018 12:34 PM". There are "Save" and "New Metric" buttons.

The main section is titled "Focus Metric Weights and Targets" and contains four metric settings, each with a checked checkbox, a "Weight %" dropdown, a "Target Value" dropdown, and text input fields for "Title Text", "Legend Text", and "Help Text".

- Number of Comments Made on Admin Updates:** Weight %: 100, Target Value: 7. Title Text: Number of Comments You Made on Instructor Updates. Legend Text: Engagement with Admin Updates. Help Text: Making comments on instructor updates can improve this score.
- Number of Updates Authored:** Weight %: 100, Target Value: 7. Title Text: Number of Updates You Have Made in the Community. Legend Text: Updates Created. Help Text: Making updates to your community can improve this score.
- Average Number of Words Per Update Authored:** Weight %: 100, Target Value: 200. Title Text: Average Word Length of Your Updates. Legend Text: Update Effort. Help Text: Making your updates more substantial can improve this score.
- Number of Projects Started:** Weight %: 100, Target Value: 2. Title Text: Percent of Community Projects You Have Started. Legend Text: Projects Commenced. Help Text: Getting a start on all of your projects can improve this score.

### A4.3.1 Focus Metrics

What focus measures do you expect to apply?

- Select check boxes to determine which metrics you wish to apply (whether or not this petal will appear in the aster plot).
- Select the weight you wish to assign to that metric (the width of that petal in the aster plot).
- Select a target value or learning objective (what it will take to color this petal to the circumference of the circle).
- Review and revise the standard text that appears in the petal mouseovers and the color-coded legend on the Analytics landing page.
- Add a custom focus metric if you wish.
